RISK ASSESSMENT MONITORING TOOL

INTRODUCTION

This risk assessment monitoring tool is the result of an intergovernmental partnership established by AGA in cooperation with the US Office of Management and Budget. It is intended to provide states with a method for assessing subrecipient risk and to be applicable across federal granting authorities, as well as across monitoring authorities. While it may be useful in supplementing existing tools, it is not intended to replace any risk assessment tools that may already be in use by monitoring agencies.

In using this tool, monitoring agencies are encouraged to develop applicable risk factors to evaluate programmatic compliance risk and should use professional judgment in developing a weighted scoring system for each component of the assessment.

This tool is designed to be used in conjunction with the Financial and Administrative Monitoring Tool to evaluate which subrecipients may require further, more intensive monitoring. The Financial and Administrative Monitoring Tool is available on AGA's website at <http://agacgfm.org/intergovernmental/resources.aspx>.

This assessment was developed to be as comprehensive as possible. Some items may not be applicable to certain monitoring agencies, programs or subrecipients. If items are not applicable, "N/A" should be used. Monitoring agencies should document the rationale for not applying a particular risk item.

The Programmatic Assessment questions are for illustrative purposes only. Offices using this assessment should develop specific, program risk assessment questions based upon the governing compliance statutes, rules and supplements for the program.

FINANCIAL STABILITY ASSESSMENT: NON-PUBLIC/NOT-FOR-PROFIT/COMMUNITY BASE ORGANIZATIONS

1. Purpose:

The purpose of this section is to use the Financial Statements of the entity/organization to determine its financial health. If independently audited financial statements are not available, the organization’s Chief Financial Officer should be asked to prepare and certify a financial statement. Generally Accepted Accounting Principles require organizations to maintain the following information:

(a) Financial Statements:

- Balance sheet or statement of financial position
- Income statement or statement of operations
- Statement of cash flows
- Other statements, such as
 - Retained earnings statement
 - Industry-specific statements

(b) Notes to the Financial Statements, such as:

- Accounting policies
- Related party transactions
- Subsequent events
- Contingent liabilities
- Details about debt and equity investments, inventories, fixed assets and depreciation, long-term debt and capital stock
- Disclosures as needed in other areas (e.g., leases, pensions or income taxes)

2. The Balance Sheet Statement can answer these questions:

- Can the organization pay its bills?
Yes___ No___ N/A___

COMMENTS _____

- Is there cash left over after the organization pays its bills?
Yes___ No___ N/A___

COMMENTS _____

- What is the organization’s debt trend?

COMMENTS _____

Specifically:

Answer

(a) What is the “current ratio”?

Current Assets ÷ Current liabilities

Note: A 1 ÷ 1 ratio means that the organization can just pay its bills.

Answer

(b) What is the "Acid Test Ratio"?

The formula is:

$$\frac{\text{Current Assets} - \text{Inventories}}{\text{Liabilities}}$$

Note: The current asset – current liabilities ratio provides you with a working capital index. This ratio measures the immediate debt paying ability of an organization. A 1.0 to 1.01 acid-test ratio is usually considered adequate because it indicates that for every dollar of debt there is one dollar of assets that can be converted into cash on short notice to meet current obligations.

(c) What is the organization's Debt to Equity Ratio?

The formula is:

$$\text{Total Liabilities} \div \text{Total Equity}$$

Note: The "debt to equity ratio" provides information on what the organization owns.

3. Statement of Cash Flows

The Statement of cash flows shows cash "coming in and going out" and can help answer important questions, like:

- What generated the entity's increase (or decrease) in cash balance?
- How did the entity utilize the cash provided by operations?
- How did the entity finance any fixed asset purchases or long-term investments?
- What uses did the entity make of cash generated by borrowing or by issuing stock?
- If an entity operated at a loss, how was it able to pay its bills?
- If an entity operated at a profit, why didn't the cash balance increase?
- Can cash flow support future needs such as debt requirements?

(a) Has the organization operated at a loss for the current or past periods?

Yes____ No____ N/A____

COMMENTS _____

(b) Is debt growing or declining?

Growing____ Declining____

4. Notes to the Financial Statement and Report of the Independent Auditor

The notes and “management letters” contain information and disclosures important to the understanding of the financial statements. The notes may seem lengthy and detailed, but some of the real story may be gleaned from a careful reading of these notes.

- (a) Do the notes to the financial statements or management letters disclose potential financial problems at the organization (e.g., pending lawsuits, outstanding judgments, major loans to or from officers, etc.)?
Yes___ No___ N/A_____

COMMENTS _____

- (b) Do the loan notes reflect (including loans from officer) indicating poor financial health (e.g., unusually high interest rates, unusual repayment provisions, etc.)?
Yes___ No___ N/A_____

COMMENTS _____

- (c) Does the independent audit report for the most recent fiscal year contain an unqualified audit opinion?
Yes___ No___ N/A_____

If not, what kind of opinion did the auditor express? Why did the entity not receive an unqualified opinion? _____

5. Other non-public entity financial stability assessment (entity-specific)

PROGRAMMATIC ASSESSMENT

Similar to the sections above, the programmatic risk assessment should include items that assess risks in meeting program requirements and objectives. The examples below are geared toward Department of Education assessments. However, agencies using this tool should review their applicable programmatic requirements found in statute, rule and supplements to develop specific risk criteria.

1. Did the entity meet Annual Measurable Achievement Objectives?
Yes___ No___ N/A_____

COMMENTS _____

2. Does the entity have a system in place for parent notification?
Yes___ No___ N/A_____

COMMENTS _____

3. Did the entity meet notification requirements?
Yes___ No___ N/A_____

COMMENTS _____

4. Other criteria which are required by applicable statute/rule.

The Partnership for Intergovernmental Management and Accountability (Partnership) was established by the Association of Government Accountants (AGA) in September 2007 to open the lines of communication among governments. The mission of the A-87

Work Group is to identify and prioritize issues or concerns, and provide recommendations for alternative approaches, which could enhance implementation of 2 CFR Part 225 and provide benefits to all levels of government. AGA is the premier Association in advancing government accountability. AGA supports the careers and professional development of government financial professionals working in federal, state and local governments, as well as the private sector and academia. Founded in 1950, AGA has a long history as a thought leader for the government accountability profession. Through education, research, publications, certification and conferences, AGA promotes transparency and accountability in government.
